Guillermo Pérez Ruiz

Tech Lead (Hands-On) / Senior Full-Stack Engineer

Hands-on **Tech Lead** with a strong focus on product, architecture, and execution. I lead from the code ("player-coach"), combining technical decision-making, balancing product priorities with technical debt, and direct implementation of complex, high-impact changes. Specialized in modernizing legacy platforms, scalable cloud architectures, and advanced CI/CD.

PROFESSIONAL EXPERIENCE

Tech Lead (Hands-On) / Senior Full-Stack Engineer

2021 – PRESENT

MAHLE SmartBike Systems

Technical owner of the digital ecosystem, leading a team of 4 Full-Stack engineers.

- Legacy Modernization:** Transformed a large React/Express application with severe technical debt (monolithic files, manual deployments) into a modern architecture.
- Cloud Infrastructure:** Migrated entire infrastructure to **AWS ECS (Fargate)** with auto-scaling, ALB, and orchestrated the frontend on S3 + CloudFront.
- Advanced CI/CD:** Implemented automated pipelines with branch sync, release blocking, and integrated quality gates using **Snyk**, **SonarQube**, and **E2E testing**.
- Frontend Evolution:** Led progressive migration to **React Hooks** and **TypeScript**, ensuring 24/7 production stability for thousands of users.
- Data Optimization:** Decoupled monolithic DB by moving raw location data to S3, sessions to Redis, and volatile configs to NoSQL.
- Electron & Low-Level:** Developed/maintain an Electron app for manufacturing lines, integrating **CAN bus/UDS protocols** for bike diagnostics and firmware updates.

QA-DevOps & Full-Stack Developer / Technical Lead

2020 – 2023

Izertis S.A. (Client: Inditex)

Core member of a transversal team improving software quality across thousands of repositories.

- Enterprise Automation:** Developed mass-analysis scripts and centralized metrics in **Grafana** to evaluate the technical health of the entire organization.
- Technical Lead:** Headed the development of the internal Application Discovery Platform ('Yellow Pages') using **React**, **Spring Boot**, and **Kafka**.
- Standardization:** Enforced quality gates (**Sonar**, **Jacoco**, **Snyk**) and migrated legacy pipelines from **Bamboo** to **GitHub Actions** at global scale.

Full-Stack Programmer Analyst

2018 – 2020

Cognizant Technology Solutions

Full-stack development for KBC Bank (Belgium) in a microservices environment.

- Banking Flows:** Modernized digital banking features, migrating legacy components to modern Angular while maintaining high security standards.
- Microservices:** Designed and implemented high-criticality services from scratch using **Spring Boot** and **Scala**.
- Global Collaboration:** Worked in 100% English-speaking squads distributed across Belgium, India, and Czech Republic.

PERSONAL PROJECTS (PRODUCTION-READY)

Adventure Forge
AI-powered engine with dynamic narrative/image generation and high-availability fallback system (NestJS, React, MongoDB).

Galactic Conquest
Space-themed procedural deckbuilder roguelike leveraging AI for card generation and world-building (React 19, Vite).
