Guillermo Pérez Ruiz

Tech Lead (Hands-On) / Senior Full-Stack Engineer

Senior Tech Lead and Architect with over 7 years of experience specialized in **legacy platform modernization** and **scalable cloud infrastructures**. Expert in bridging the gap between product strategy and engineering execution. Proven track record in leading cross-functional teams, orchestrating high-traffic digital ecosystems, and integrating cutting-edge AI automation into production workflows.

PROFESSIONAL EXPERIENCE

Tech Lead (Hands-On) / Senior Full-Stack Engineer 2021 – PRESENT

MAHLE SmartBike Systems

Technical owner of the digital platform ecosystem, leading a squad of 4 Full-Stack engineers.

- **Legacy Modernization:** Transformed a monolithic React/Express application with severe technical debt into a micro-service ready architecture, eliminating manual bash-based EC2 deployments.
- **Cloud Infrastructure:** Architected and migrated all services to **AWS ECS (Fargate)** with auto-scaling, ALB, and orchestrated the frontend via S3 + CloudFront.
- **Advanced CI/CD:** Engineered automated multi-environment pipelines with branch synchronization, release blocking mechanisms, and integrated **Snyk/SonarQube** gates.
- **Electron & Hardware:** Built an Electron application for end-of-line manufacturing, integrating **CAN bus** and **UDS protocols** for bicycle diagnostics and firmware management.
- **Data Architecture:** Optimized storage by decoupling the monolithic database; migrating location data to S3, sessions to Redis, and volatile configs to NoSQL.
- **Observability:** Implemented enterprise monitoring with **Grafana** and CloudWatch alarms for real-time fault detection.

QA-DevOps & Full-Stack Developer / Technical Lead 2020 – 2023

Izertis S.A. (Client: Inditex)

Member of the enablement team improving software quality across Inditex's global portfolio.

- **Scale Automation:** Developed mass-analysis scripts to evaluate the technical health of thousands of repositories, centralizing scoring metrics in Grafana.
- **Application Discovery:** Led as Technical Lead the development of the company-wide "Yellow Pages" platform using **React**, **Spring Boot**, and **Kafka**.
- **Standardization:** Migrated legacy Bamboo pipelines to modern **GitHub Actions** and enforced organization-wide quality gates (Jacoco, Sonar).

Cognizant Technology Solutions
Full-stack development for KBC Bank (Belgium) in a microservices environment.

- **Banking Evolution:** Modernized digital banking features, migrating legacy AngularJS components to modern Angular while maintaining transaction integrity.
- **Microservices:** Designed and implemented high-criticality services from scratch using **Spring Boot** and **Scala**.
- **Global Collaboration:** Operated in 100% English-speaking squads across Belgium, India, and Czech Republic.

PRODUCTION PROJECTS (PERSONAL)

Adventure Forge

AI storytelling engine with dynamic narrative/image generation and high-availability model fallback system.

View System

Galactic Conquest

Space-themed procedural deckbuilder roguelike leveraging AI for dynamic content (React 19 + Vite).

View Code

Crearte es Arte

Professional artisan e-commerce platform with automated Vercel CI/CD and SEO optimization.
